Double Wall Insulated

For Chase covers or custom caps that need to cover a single flue or multiple flues, use this example for a measuring guide

Measure from the left bottom corner to the center of the hole. For multiple flues, measure from the bottom left corner to the center of each hole. Also measure the overall length and width of the chimney.

For chimney caps, measure the length & width on all 4 sides. Also, measure the diagonals to make sure it is square.
